**INSTRUCTIONS:**

The purpose of this worksheet is to provide information about water services and associated work to the Development Services Department and the Public Works Department. It is required for all water service/meter modifications.

Customers seeking replacement of a lead water service may qualify for assistance from the Village of Oak Park. To qualify, the property must be the primary residence of the customer and the existing water service must be documented as being lead material.

**OWNER INFORMATION:**

Complete address and owner information is required. Contact information is requested if there are any questions.

**SERVICE SUPPLY TYPE:**

List whether the water service is only for domestic use, fire sprinkler use, or a combined sprinkler & domestic use. Completion of the **WATER SERVICE SIZING WORKSHEET** is requested for any upgrades above the minimum requirement of one inch (1") service and three-quarter inch (3/4") meter.

**COST DETERMINATION:**

This section will be completed by the Public Works Department with cost basis as follows:

1. Approved water service sizes are 1" (minimum), 1 ½" and 2", Type K Copper tubing. Services larger than 2" diameter will require Class 52 Ductile Iron Pipe.
2. New B-box will be required for all new curb stops.
3. Full cost of the water meter will be charged if the existing meter does not meet the sizing requirement.

**CONSTRUCTION REQUIREMENTS:**

1. Oak Park Public Works Department shall have a minimum of three working days notice before any work in the right-of-way is started.
2. All spoils must be removed from site as excavations are made. The work area must be kept neat at all times.
3. All excavations shall be secured and protected while contractor is not on site.
4. Failure to complete all requirements may result in a partial or total forfeiture of Bond.
